NYLUS™

FROM FIELD TO OFFICE

With one centralized system, schedule entire teams, trucks and equipment from one dashboard & connect office to field with our mobile app.

VAC & CONSTRUCTION FIELD OPERATIONS SYSTEM

1-888-674-3978 nylus.ca info@nylus.ca

PRODUCT FEATURE

Our Enterprise Field Operations Management System (FOMS) is Nylus' solution to controlling field operations. With FOMS, our clients gain access to a single, all-in-one system that covers all aspects of Field Operations. Additionally, each client is assigned a dedicated account representative who will provide onboarding, training, and additional support throughout the implementation process.

VAC & CONSTRUCTION MODULES

ALL-IN ONE SYSTEM

1 PRICEBOOKS

No longer will you need to search through paper price books for customer service rates. You can now utilize custom pricing for all your services and have them calculate automatically on the job ticket. This custom pricing can be tailored to each customer, job, or project.

2 REMOTE SIGNOFF

Missed a signature? No problem. See all your missed field signatures on our specialized sign-off dashboard. Send a link to any customer who missed a sign off for them to complete on their tablet.

3 TRUCK MAINTENANCE

Use truck check forms submitted in the field to create real time notifications and maintenance pooled jobs. Have your in house mechanic create maintenance work orders and assign people and priorities.

4 SERVICE TIMESHEETS

Each company is unique to how they track time. Run service timesheet reports in NYLUS and save hrs. during payroll periods. Use our payroll rules to customize how you capture hours of your employees.

VAC & CONSTRUCTION MODULES

ALL-IN ONE SYSTEM

5 E-WORK TICKETS

Customize your work ticket out of NYLUS using our custom form builder. Never settle for an out of the box design. Our team will create and design your electronic form using our industry knowledge for both dispatching and truck maintenance.

6 SAFETY MANAGEMENT

Attach safety certifications to each resource profile to present electronically on site. Dispatch jobs using site specific or customer specific orientations. Have mandatory truck check forms filled out before each job and submitted with a geo-location.

7 DOCUMENT MANAGEMENT

Document management allows for efficient storage, retrieval, and control of information. It ensures that all documents related to the job site, such as contracts, safety requirements, and customer information, are easily available to the applicable person.

8 GEO-MARKERS

Our Geo-Marker functionality allows you to mark important locations on the map and associate images and data with the pins. This will help you better visualize and understand the data you're working with.

VAC & CONSTRUCTION MODULES

ALL-IN ONE SYSTEM

9 GPS & TRUCK REPORTS

Track and monitor your fleet in real-time. Use our commercial heavy and or lite duty unit plug-in devices to track routing, PTO, speed and more. Always know where your entire fleet is.

10 PUNCH CLOCKS

Our mobile app allows employees to punch in and out in real-time for work, lunch, and travel time, making it easy to track employee hours. With our punch clock dashboard and reports, you can easily see which employees are clocked in and out accurately.

11 PAYROLL REPORTING

This will allow you to easily export information to other accounting systems and accurately track and report employee wages. Combine these reports with the punch-clock module or service timesheets.

12 INVOICING

NYLUS allows users to conveniently send multiple documents to customers, such as work tickets, pictures, safety forms, and job files, all in a single invoice. This makes it easy for customers to receive and access all pertinent information at once.

VAC & CONSTRUCTION MODULES

ALL-IN ONE SYSTEM

13 NOTIFICATIONS

Easily set up work flow triggers and notifications using our work flow rules. From truck maintenance to accident report submission to expired resource training, our software can handle it all. NYLUS offers the ability to create work flow triggers and notifications with ease.

14 INVENTORY

Stay on top of your inventory by utilizing the cost plus pricing method for customers on work orders. Let operators or technicians add materials to field tickets. Additionally, make use of the warehousing feature to keep inventory separated in multiple locations.

15 SALES ORDERS

You can easily integrate your sales orders with NYLUS or create a sales order directly in the system. This allows you to connect any sales order to a specific project or job via our system or on the mobile app.

16 GENERAL FORMS

This module can be used to generate various types of forms that are not safety or work tickets. Customize and create unlimited electronic forms to be used on jobs or ad-hoc on the mobile app.
