presents

HYDROVAC

Field Operations Management System

Tailored for Hydrovac Companies to maximize dispatching efficiency, cost control and job tracking

Unit Scheduling (operators/labourers)

All-in one screen, for multiple unit dispatching of jobs. Use our in app instant messaging, last on site & track units routes real time to their jobs all on one dashboard from office to the field.

Safety Management/Orientation

Allow safety forms to be mandatory with jobs. Associate training to site specific jobs; never send an untrained resource to the job site. Manage all safety forms and truck check forms with submission location within your safety dashboard.

GPS Tracking & Routing

Use NYLUS mobile app or device plug-ins to manage your fleet from the yard to the job. See route job history and geo-fencing directly on your dispatch board. Pin your jobs to the dispatch dashboard map for optimal routing.

Customer Rates/Custom Pricing

Apply customer specific rates to your field services automatically and reduce paperwork and flipping through price books. Leverage this feature to also associate price rates to jobs or project specific work if needed.

Electronic Tickets/LEMs

Full customize your own work tickets using our robust form builder and not be limited to an out of the box form. Capture e-signatures out in the field, geo mark pole & anchors directly on the field ticket or track customer sign-offs.

Timesheet/Invoicing

Pull user services and rates directly off the field tickets and build your field resource timesheet in seconds. Create invoices directly from the work field ticket and email to customers within the app.

Manage Long Term/Daily Jobs

Manage all your long term projects on the dispatching boards and convert them into daily jobs as needed. Pin long term jobs to the dispatching map and attach project files to your long term jobs to carry over into your daily jobs.
