

HAZARDOUS

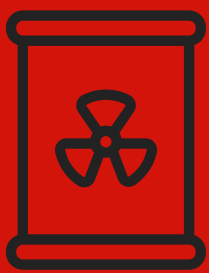

Field Operations Management System

Tailored for Hazardous & Water Companies to maximize dispatching efficiency, cut fuel cost and manage regulations

ISO Week Scheduling (drivers)

All-in one screen, NYLUS allows you to route your commercial trucks using ISO week scheduling. Have the option to set your pick up intervals every 6 or 8 weeks.

Waste Regulations

Always keep track of federal or local waste regulations and codes from your master list, work orders and on the scheduling dashboard.

GPS Tracking & Routing

Use NYLUS mobile app or device plug-ins to manage your fleet from the yard to the job. See route job history and geo-fencing directly on your dispatch board. Pin your jobs to the dispatch dashboard map for optimal routing.

Service Pricing Reports

Have on hand your specialized prices for each customer and by waste class you are picking up. Use this to incorporate different country or province/state regulation.

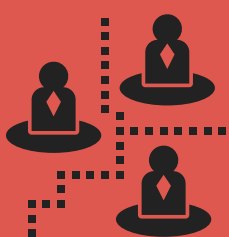

Dangerous Goods Work Tickets

Full customize your own work tickets using our robust form builder and not be limited to an out of the box form. Capture e-signatures, include waste classes, regulation codes and customer pricing.

Customer Management

Keep track and manage of all your customers in one database. Associate all your subsidiaries with a parent to child customer to customer relation.

Territories/ Zones

Access your schedules using our specialized zoned maps. Group all your customers and assign them to a territory/ zone for dispatching and pick-ups.
